

HCSS East Math Summer Work 2020

Complete 10% Mastery of Khan Academy

- 1) Go to www.khanacademy.org
- 2) Click “login”, sign in using Google, be sure to use your school gmail account.
- 3) Click “Courses” at the top of the page and choose the correct math course (see list below).
- 4) Once here you can start watching videos, practicing questions, and taking quizzes on any topic you like.
- 5) Most practice you do will earn you Mastery Points and increase your percentage of completion.
- 6) Your goal is to achieve at least 10% mastery before we return to school in the fall, but we challenge you to get your percentage as high as possible.

**Note that this is not the Mission challenge that we were using before, which will be removed after June 30th.*

The course you will be working on in Khan Academy is decided by your grade level next year, not the math class you will be taking. The exception is for seniors, who will take the course that corresponds with their math class.

Grade Level for 20-21 School Year	Khan Academy Course
7th	Math 7
8th	Math 8
9th	Algebra I
10th	Geometry
11th	Algebra 2
12th (AP Calculus)	AP Calculus
12th (Precalculus)	Precalculus
12th (Statistics)	Statistics and Probability
